The following instructions are for installing ArcGIS Desktop 10.7.

**Prerequisites:**

1. VPN Access
2. .NET Support - ArcGIS Desktop requires Microsoft .NET Framework Version 4.5. If a minimum installation of .NET Framework 4.5 is not detected on your machine, the ArcGIS Desktop setup will not proceed.

**System Requirements:**

- Disk Space: 4 gigabytes (GB) of available hard-disk space.
- Display: 1024*768 or higher screen resolution
- Memory: 4 gigabyte(GB) of RAM or more is required, 6 gigabyte(GB) of RAM or more is recommended
- Processor: 2.2 GHz or faster

**Installation:**

1. Double click the file you downloaded to run the installer. Click Run.

2. Click Next when asked to select the destination folder. It is recommended to use the default destination.
3. Wait for the package files to extract to your computer.

4. When the installation files are successfully extracted, make sure the “Launch the setup program” box is checked, and click Close.

5. Click Next on the Welcome window to continue installing ArcGIS Desktop.

6. Accept the master agreement and click Next.
7. Select the Complete install type. Click Next.

8. Click Next to continue with the default destination folder.

9. Click Next to continue with the default Python destination folder.

10. Choose whether you would like to participate in the Esri user experience program and click Install.
11. Wait for ArcGIS Desktop to finish installing.

12. When ArcGIS has installed successfully, click Finish.

13. When presented with the ArcGIS Administrator Wizard, select “Advanced (ArcInfo) Concurrent Use” then choose “Define a License Manager now:” and type “SU-License-MGMT.susqu.edu” to activate. You do not need to click on “Browse…” Click OK.
14. Click OK when shown the configuration information. You can now use ArcGIS Desktop.

If you experience any issues with installation, please contact the Help Desk at helpdesk@susqu.edu or 570-372-4502.
