How to install Adobe Creative Cloud applications on your computer:

All SU employees are eligible for an SU Adobe Creative Cloud account. With an Adobe Creative Cloud account, you get two installation licenses for desktop applications (one for your work computer, one for a home computer), mobile device applications, Adobe Sign, and other Cloud components. Adobe desktop applications include, but are not limited to, Photoshop, Acrobat, Lightroom, Illustrator, InDesign, Premiere Pro, After Effects, Audition, and Dreamweaver. If you need assistance with installing the desktop applications, please see the instructions below:

1.) Governing faculty during the Fall 2016 semester were pre-registered for Adobe Creative Cloud accounts, if you were a governing faculty member during the Fall 2016 semester (or you have already requested your Adobe Creative Cloud account), go directly to step 2. If you became governing faculty after the Fall 2016 semester, are a non-governing faculty member (including adjuncts), or are a staff member, you do not have an Adobe Creative Cloud account – but one is available by request. If needed, submit an IT service request to helpdesk@susqu.edu requesting an account. Once you receive a confirmation email indicating that you have an SU Adobe Creative Cloud account, proceed to step 2.

2.) Go to adobe.com – click the “Sign In” button:

   a.

3.) Sign in with your @susqu.edu credentials. If prompted to choose between an Adobe ID or Enterprise ID, choose Enterprise ID.

a.

4.) Once signed in, you’ll be taken to your Adobe Creative Cloud portal – in the menu box, choose “Desktop Downloads” in the “Creative Cloud Apps” category:
5.) You’ll be taken to the Desktop Apps installation webpage. The easiest option is to start with installing the Creative Cloud app (we recommend NOT installing the actual applications from this page – just the Creative Cloud app):

![Creative Cloud](image)

a. Proceed with downloading and running/installing the app.

6.) Once the Creative Cloud app is installed, you’ll have a quick and easy way to install the other applications you want on your computer, as well as to access the other components of your Creative Cloud account. You may need to sign in to the app with your @susqu.edu credentials. The Creative Cloud app will always run on your computer, it can be found in the top menu toolbar on Mac OS, or in the bottom taskbar (by the clock) on Windows:

![Desktop Icons](image)

a. Click “Install” on just the applications you want. Note that installing all of the apps will use a considerable amount of hard drive space on your computer, so we recommend only installing the apps you need.
7.) You'll be shown the installation progress:

8.) Once the app is installed, you'll have an “Open” option. You can open the apps from here, or you can also find them in your Windows Start Menu (Windows) or Applications folder (Mac) just like any other application. The first time you launch an Adobe app, you may need to activate it with your @susqu.edu credentials.
