IBM SPSS Statistics Software (Mac)

The following instructions are for installing IBM® SPSS® Statistics version 26 using the license type concurrent user license.

Prerequisites:

1. VPN Access

System Requirements:

- Disk Space: 4 gigabytes (GB) of available hard-disk space.
- Display: 1024*768 or higher screen resolution
- Memory: 4 gigabyte(GB) of RAM or more is required, 8 gigabyte(GB) of RAM or more is recommended for 64-bit Client platforms.
- Processor: 1.6 GHz or faster

Installation:

1. Double click the .dmg file that you downloaded.
2. Double click “SPSS_Statistics_Installer” and wait for the installer to open. You may see it loading on your Mac’s dock.
3. Enter your computer’s admin password when prompted.

4. Choose your language and click OK.
5. Click Next on the Introduction of the installer.

6. Accept the license agreement. Click Next.

7. Choose “Yes” to install IBM SPSS Statistics – Essentials for Python. Click Next.
8. Accept the terms of the license agreement and click Next.

9. Accept the final license agreement. Click Next.

10. It is recommended to use the default install folder. Click Next to continue with the default install folder.

11. Click Install.
12. Wait for the installation to finish.

13. Make sure “Start SPSS Statistics 26 License Authorization Wizard now” is checked and click Done.

14. Click Next when prompted with the License Status window.
15. When presented with the Product Authorization window, choose “Concurrent user license” and click Next.

16. Enter “SU-License-MGMT.susqu.edu” as the License Manager name. Note: Failure to enter the name of the server exactly as shown below may result in SPSS failing to activate.

17. You should see the message below when SPSS has successfully activated. Click Finish. You can now open and use SPSS. Remember, you must remain connected to VPN to use SPSS.

If you experience any issues with installation, please contact the Help Desk at helpdesk@susqu.edu or 570-372-4502.
